

2020 FLEXITEC

Multi-surface GRP roofing system

Comparing Liquid Roofing Systems in the Merchant Market

Feature	Typical GRP (Fibreglass)	Flexitec 2020	Typical Overlay System
Can be walked on 30 minutes after application	✓	✓	✗
Extra-tough, impact-resistant finish	✓	✓	✗
Rapid cure system with very fast application times	✓	✓	✗
Can be applied to vertical sections without the need for costly additives - no slumping or sagging issues	✓	✓	✗
Able to rapidly breakdown with CSM reinforcement for quick and tidy detailing work - no fleece/cloth pre-cutting works	✓	✓	✗
A two coat application can be done in around 1 hour, rather than waiting until the next day	✓	✓	✗
Fully reinforced for consistent application thickness, increased crack-resistance and zero risk of weak points	✓	✓	✗
One resin system - no need for different base and top coats	✗	✓	✓
Can be applied direct to felt, asphalt, GRP, concrete, single-ply and timber	✗	✓	✓
Can be over-coated without grinding down to base coat	✗	✓	✓
Able to seal existing roof details without the need for trims	✗	✓	✓
Can be a one coat (10 year) or two coat (20 year) system	✗	✓	✓
Highly flexible membrane - no need for expansion joints no matter the size or shape of the roof	✗	✓	✓
Save time and money by overlaying a roof instead of stripping and replacing the deck	✗	✓	✓
Uses powder hardener instead of liquid catalyst for safer and easier catalysing with rapid resistance to rainfall	✗	✓	✗
